

# The Future of IASTM

**“Superior to any such product on the market.”**

Eric Waters, MS ATC NASM-PES CSCS, Head Athletic Trainer, Washington Wizards, 2009-2010 NBA Athletic Trainer of the Year

HawkGrips are the finest soft-tissue therapy instruments in the world. Our stainless steel instruments are used to break down scar tissue and fascial restrictions, increasing range of motion and decreasing pain. Additionally, HawkGrips are ergonomically designed to ease the strain placed on the hands of the clinicians, which extends career longevity.

- Instruments detect and treat soft-tissue abnormalities that can lead to pain and dysfunction.
- The instruments “catch” on fibrotic tissue, identifying areas of restriction.
- Specially designed instruments are used to introduce controlled micro-trauma breaking up scar tissue and initiating the healing process.
- Stainless steel instruments resonate, allowing the clinician and patient to feel soft-tissue irregularities much like how a stethoscope amplifies a heartbeat.
- HawkGrips offer the widest variety of treatment edges and instruments, ensuring precise treatment and promoting faster rehabilitation.

## HawkGrips Can:

- Prevent surgery
- Reduce need for medication
- Increase range of motion
- Resolve chronic conditions
- Speed recovery
- Improve patient outcomes
- Enhance athletic performance
- And much more

## The Benefits of HawkGrips:

- Shorten treatment time
- See more patients
- Extend your career
- Better gripping
- More instruments
- More treatment edges
- No licensing fees
- No contracts
- No support fees
- Lasts a lifetime

"After years of working with various instruments, I knew immediately that I was seeing the Gold Standard of IASTM when I came across HawkGrips. The variety of treatment edges, textured gripping and quality surface finish are unmatched for patient and therapist comfort. HawkGrips are the future of IASTM treatment and the tools I prefer to use when treating my patients."

- Mark Butler PT, DPT, OCS, Cert. MDT

HawkGrips are currently being used by teams in the NFL, MLB, NBA, NHL, and NCAA, as well as by members of the PGA, the U.S. Military, and the Olympic Teams. These world-class organizations deserve the best and so do your patients.
